

Breakable Security Policy

SSL

Breakable takes our responsibilities and obligations to protect the personal information of our customers very seriously. Comprehensive security measures have been carefully implemented and subjected to rigorous independent testing in order to provide a safe and secure shopping environment of our customers.

Breakable uses a separate credit card transaction gateway provided by the National Australia Bank via the NAB Payment Gateway. We utilise industry-standard Secure Sockets Layer (SSL) technology to allow for the encryption of potentially sensitive information such as your name, address and other critically sensitive information like your credit card details. Information passed between your computer and our website cannot be read in the event someone else intercepts it.

For add on security, Breakable may in some cases contact you to confirm your order prior to dispatch.

In the unlikely event of unauthorised use of your card you must report the unlawful transaction immediately to your credit card provider in order to qualify for security protection.
